

BlastFlex™

Highest accuracy for light control

Key characteristics:

- Protector: Glass
- LED type: high-power 4mm²
- Backlight control: not needed
- Collimators: silicon

Using silicon collimators, the BlastFlex™ photometric engine offers the highest efficacy for directional beams dedicated to specific applications in architectural and sports lighting.

The ability to control the light with the highest accuracy reduces the light spill in the surroundings and contributes to an optimal use of the energy consumed.

Thanks to a superior thermal resistance, the BlastFlex™ optics can work with very high currents to provide large lumen packages and do not suffer from the yellowing effect over time.
